## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-32, 34-37, and 39-42 are rejected under 35 U.S.C. 102(b) as being anticipated by Pettersen (WO 97/14015).

For claims 1, 16-26, 30, 36, 37, and 40, Pettersen shows a system for point-by-point measuring of spatial coordinates comprising:

a stationary portion (1) having at least a first laser radiation source (32) and at least a first optical detector (38);

a rotatable portion (21-25) that is rotatable with respect to the stationary portion;

at least a first optical fiber *system or path* (33, 36, 26, 22, 21), the emission end (22, 21) disposed on the rotatable portion, wherein an emission direction of the laser radiation is controlled according to the rotation of the rotatable portion;

a retroreflective target (4-8);

an optical coupler (28);

an orientation camera (38).

As for claim 4, three dimensions of position and three dimensions of orientation are determined.

Art Unit: 2877

As for claim 5, a second arrangement is on element 3a.

As for claims 6-9 and 39, please see elements 21-28.

As for claim 10, please see retroreflector 6.

As for claim 11, 34, and 35, please see camera 39.

As for claims 12, 13, 28, and 29, please see actuators 23 and 25.

As for claims 14, 15, and 27 please see optical fiber systems 30-33 and 36.

As for claim 31 and 32, please see lenses 35, 26.

***Allowable Subject Matter***

3. Claims 22 and 38 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to show or to suggest a laser based coordinate measuring device comprising of the elements as presently claimed wherein the orientation camera is disposed on the rotatable structure or wherein the locator camera includes a plurality of light sources disposed substantially circumferentially about a central point, and a detector disposed substantially at the central point.

Papers related to this application may be submitted to Technology Center (TC) 2800 by facsimile transmission. Papers should be faxed to TC 2800 via the PTO Fax Center located in CP4-4C23. The faxing of such papers must conform with the notice published in the Official

Gazette, 1096 OG 30 (November 15, 1989). The CP4 Fax Center numbers are 703-872-9318 for regular communications and 703-872-9319 for After Final communications

If the Applicant wishes to send a Fax dealing with either a Proposed Amendment or for discussion for a phone interview then the fax should:

a) Contain either the statement "DRAFT" or "PROPOSED AMENDMENT" on the Fax Cover Sheet; and

b) Should be unsigned by the attorney or agent.

This will ensure that it will not be entered into the case and will be forwarded to the examiner as quickly as possible.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Hwa Lee whose telephone number is (703) 305-0538.

The examiner can normally be reached on M-Th. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Frank Font can be reached on 703-308-4881.
